DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

1. Claims 1, 3, 4, 6-8 are rejected under 35 U.S.C. 102(a) as being anticipated by Ohori et. al. (USPN 6,446,806).

Regarding to claims 1, 4, 7, and 8, Ohori et. al. disclose that a method and an apparatus for supplying electric power to a substrate container (see fig. 13) having a rechargeable cell comprises a body (a mounting base 64) for seating a substrate carrier container (1); a seating detecting device (a detector on the mounting device, see col. 16, lines 15-18) for detecting whether the container is seated on the body or not; a power supply connector (13) movable provided the body; a control mechanism (60) for bring the power supply connector into contact a charging terminal of the container to the rechargeable cell (62) in the container according to the detected signal from the detecting device; and returning the connector to the original position after the rechargeable cell is charged (when the container is released from the mounting base 64 by the lifting and lowering mechanism 60).

Regarding to claims 3 and 6, Ohori et. al. disclose the seating detecting device (the detector mounted on the base 64) comprises at least one of a mechanical switch (locking mechanism 17)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohoei et. al. in view of the admitted prior art (APA). Ohori et. al. disclose all limitations of claims 1 and 4 except for the container having an air cleaner and a dehumidifying device. APA discloses the container have an air cleaner (a filter) and a dehumidifying device in the substrate carrier container (dehumidifying agent) (see background of the invention, page 2). It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the substrate carrier container of Ohori et. al. with the air cleaner and the dehumidifying device as taught by APA in order to reduce contaminants in the container.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure Lewis et. al. (U.S. Patent No. 6,427,096) disclose that the substrate carrier container prevent contaminants in the container.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Danny Nguyen whose telephone number is (703)-305-5988. The examiner can normally be reached on Mon to Fri 8:00 AM to 4:30 PM.
